

SURAJ BHANARKAR

[in LinkedIn](#) | [7020232834](#) | [surajbhanarkar08@gmail.com](#) | [GitHub](#)

Skills

- **JavaScript** | **React** | **Node.js** | Angular | **Unix/Linux** | Python | Django | HTML | CSS | SQL | Kubernetes | Test Automation | Spring Framework | **Data Structures and Algorithms** | Git | Github | Java | Version Control | Design patterns | Autonomy
- Microservices | SASS | Frontend Frameworks | Software architecture | **Componentization** | **Agile development**

Experience

- | | | | |
|--------------------------------------|-----------------------------|---------------------|-------------------|
| Software Development Engineer | Leadows Technologies | Nagpur, Maharashtra | 09/2023 - Current |
|--------------------------------------|-----------------------------|---------------------|-------------------|
- Programmed a connector API backend application (internal tool) using **TypeScript**, **Express.js**, Adapter **design pattern**, and JSON-driven architecture, reducing development time by 50%.
 - Designed interactive dashboards with **React**, **ShadCN UI**, **Tailwind CSS**, and data visualization **Charts.js** libraries to deliver **real-time insights** and improve decision-making efficiency.
 - Engineered and built **payment middleware** with callback handling, **retry mechanism**, and scheduled **cron jobs** for pending payments, ensuring **100% availability**, **scalability**, and reliability. Worked on **NestJS**, **Fastify**, **NoSQL MongoDB**.
 - Instituted **Redis caching**, resulting in lightning-fast data access and **reducing database load by 26%**.
 - Executed **parallel processing** for heavy database queries and optimized **DB indexing**, improving overall application performance by 10%.
 - Reduced security vulnerabilities by 30% by rigorously testing and implementing **encryption** protocols using **Crypto**.
 - Amplified framework robustness and code quality through **clean, scalable, and reusable code**. Upheld code integrity through active participation in **code reviews and unit testing**.
 - Set up **logging with Loki** and **Winston**, and created **monitoring** dashboards in **Grafana**.
 - Boosted user engagement by 25% through enhancements like **WhatsApp notifications**, improving communication and **user experience**, and leading to a 10% increase in user satisfaction.
 - Collaborated with product owners to refine requirements, improving accuracy by 15% and reducing cycles by 20%.

Education

- | | | | |
|--------------------------------|---|---------------------|-------------------|
| Bachelor of Engineering | Rashtrasant Tukadoji Maharaj Nagpur University | Nagpur, Maharashtra | 08/2019 - 06/2023 |
|--------------------------------|---|---------------------|-------------------|
- Major Computer Engineering

Projects

Travello: Discover, Book, Explore: [\(Github\)](#)

- Devised a budget-friendly travel platform with **Django framework** and **PostgreSQL**, featuring a curated selection of 500+ destinations and a user-friendly interface powered by advanced algorithms.
- Boosted user satisfaction by 30% by expanding the booking process with secure **online ticketing**. Employed Django for seamless booking of flights, accommodations, and travel essentials, **increasing planning efficiency by 40%**.
- Supported over 50,000 users by designing a user-centric platform with intuitive registration, login, and logout features for seamless navigation and enhanced travel experience.

Vendor Management System [\(Github\)](#)

04/2024 - 05/2024

- Built a backend using Python and Django REST to manage **100+ vendor profiles**, track purchase orders, and calculate performance metrics, securing API endpoints with **token-based authentication**.
- Implemented comprehensive data validation for models, leveraging **Django ORM** to optimize database interactions. Elevated **metrics calculations**, enabling the system to handle datasets of 10,000+ records efficiently.
- Leveraged SQLite for database management, mastering SQL concepts such as table joins, primary keys, foreign keys, and **indexing** to solve real-world issues, enhancing query performance by over **25%**.

Awards and achievements

- **TCS CodeVita Season 10: Ranked 1,225 globally** out of 100,000+ participants after successfully clearing two rounds. [\(Link\)](#)
- **Computsav Hackathon Winner**: Emerged as the winner in the CompuSav Hackathon organized by Priyadarshini College of Engineering, Nagpur, in 2021, surpassing 200+ participants. [\(Link\)](#)
- **Global Rank 32**: Accomplish global rank of 32 in the challenging CodeChef April Long Two 2022, Division 3. [\(Link\)](#)
